Mounting Bar Package is included with the dethatcher. The dethatcher can also be ordered without mounting bar. When ordering dethatchers or mounting package for the Hooker Aerator, Electric Broadcast Spreader, Blower Buggy Carrier, Leaf Blade Plow or Transporter, give mower brand name, model and deck size.

+Order Tine Rake dethatcher from Grasshopper Company.

*Model 479 for use with hydraulic lift deck; otherwise, use 470 or 472.

**Possible weight problems on the Great Dane Surfer when used with Electric Broadcaster or Transporter.

There are two rake models for the walk-behind mowers, 470 and 472. The difference is the 472 has longer support arm channels. The width of the rake is shown in the last two digits: /36, /46, /60. Following are examples showing that one Tine Rake model will fit many walk-behind mowers:
